

ALSEYE H360 – 360mm AiO water cooling

The H360 AiO water cooling system of the ALSEYE HALO series impresses with its compact design and ensures, thanks to the cooling plate made of copper and the radiator made of pure aluminum, for a reliable removal of the generated heat. The three 120mm PWM fans provide a reliable heat removal at up to 2000 rpm and also lights up in rich RGB colors.

The pump with high-quality ceramic bearing, which is also RGB-illuminated, as well as the high-quality sleeved, pivoting FEP tubes with 300mm length ensure safe, reliable and long-lasting operation.
