X2 Duplex Pro - elegant midi case with an elegant look

Large air inlets in the lid and base produce a natural, thermal airflow that can be further increased by installing two 120mm fans or a 240mm AIO water cooling system in the lid, thus optimally dissipating waste heat. Removable filter mats in front of the large air openings reduce the accumulation of dust inside the case and thus ensure a longer service life for the installed components.

The vertical installation of the ATX power supply unit in the front area of the case supports the natural thermal airflow as well as the installation of a graphics adapter up to 370 mm length despite the small case dimensions.

Two decoupled hard disk mounts, a USB Type C port and screwed slot brackets round off the package.
