

## Model: ST-5244

Art.: 88887414

This high-quality hot-swap tray allows for the simultaneous operation of up to four 2.5-inch drives in a standard 5.25-inch bay. It supports **SATA, SAS, and NVMe SSDs and HDDs**, offering maximum flexibility for a wide range of storage solutions—ideal for servers, workstations, and high-performance desktop systems.

The robust metal enclosure ensures optimal heat dissipation and reliably protects the installed drives. An **integrated 40-mm fan on the rear panel** provides additional active cooling and contributes to stable performance even under heavy load.

### Flexible mounting options:

The interchangeable frame offers two different mounting options:

1. **4× SFF-8654-4i (NVMe)** ports for direct connection of up to four NVMe drives
2. **1× SFF-8654-4i (SATA/SAS)** port for operating SATA or SAS drives via a compatible controller

Thanks to its bootability, the system is also ideal for operating systems or RAID configurations. Depending on the system and controller, hot-swap is also supported.
