Model: 4U-47045

Art.: 88887418

The 4U-47045 is a versatile 4U server case with many expansion options and is suitable for use in a 19" rack or as a stand-alone tower.

The case is designed as standard for the installation of three 5.25“ drives, one SLIM DVD drive, four 3.5” drives, and two 2.5" drives.

The number of drives can be expanded to up to six 5.25“ and two 2.5” drives or eight 3.5" and two 2.5“ drives by installing optional mounting frames.

To ensure the necessary airflow, the case can be equipped with two 80mm fans at the rear, one 80mm fan in the 3.5" hard drive cage, and one 120mm fan behind the front door, which is fitted with a removable and washable dust filter.

Adjustable graphics card holders ensure that graphics cards or other expansion cards are held securely in place.

Furthermore, the case can also be used as a stand-alone case with the optionally available “SF-47045” expansion set, which adds feet and top-mounted transport handles.

Errors excepted.
