Art.: 88887407

This 8-port server backplane is the ideal solution for high-performance data storage in server and workstation environments.

It supports SATA, SAS and NVMe interfaces for maximum flexibility and speed in data transfer. Perfect for applications where both high capacity and speed are required, such as databases, virtualization or media processing.

With this versatile backplane for servers, you get a future-proof and powerful solution for your storage requirements. Benefit from compatibility with modern interfaces and easy handling during operation.

The top row supports SATA/SAS/NVMe, the bottom row only supports SATA/SAS.

Features

8-port backplane for SATA, SAS and NVMe
